A suitable play area for every establishment

WAITING BECOMES CHILD'S PLAY

It will be more pleasant for children, parents and other visitors when children can enjoy themselves in your establishment. In addition, a kids' corner in a public area ensures that you can have undisturbed conversations with your visitors. Whether it's at the reception desk of the city hall or while waiting at the airport. Families will feel welcome because you have provided a more pleasant atmosphere. Happy children result in happy parents.

THE ADVANTAGES OF A KIDS' CORNER

A unique and challenging play corner ensures that your employees can pay more attention to your visitors. While the children play, you can give your visitors all the help they need. Because parents know that their children are also welcome, the visit is experienced as more pleasant.

Favourites at public spaces

FOREX WALL DECORATION

Our wall decorations are made of Forex (light, strong PVC foam), and are printed with quality photos and prints. Easy to maintain, and smooth on any wall. The non-reflective material ensures a beautiful result, regardless of the light in the room.

VINYL FLOOR

Our durable vinyl floors are flexible, light and solid at the same time. They are made of a very strong material on which any design can be printed. The floors are produced in a unique way to guarantee optimal quality, colour durability and wear-resistance. The image is printed in reverse on the bottom side. The entire thickness of the floor forms the UV-resistant wear layer.

EPDM PLAYFLOOR

The EPDM play floors are of high quality and offer children a safe surface to play on. The flooring is slip resistant and ensures that the impact of a fall is absorbed. According to the European safety standard, a shock-absorbent floor is mandatory if children can climb higher than 60 cm in your play corner.

PLAYMODULE SORTING TREE

The Sorting tree wall game is a sorting game in which children learn to make connections by sorting fruit. The game panel can be attached to the wall or to an IKC play system, so it takes up little space. With a frame made of beech wood and available in green and white, this play panel fits into any interior.

PLAYMODULE INTO THE WOODS

Into the woods is a game which challenges children to sort the animals to bring them back to their homes. The rectangular wall game has a natural, modern frame made of birch plywood with a white painted front which compliments many environments.

DELTA 17 WALL

The Delta 17 inch white interactive play system is available with a white and blue housing suitable to mount on the wall, on a play fence or on a play system. This popular play system can already be found in thousands of establishments all over the world.

"The children can play while the parents have time for a counselling interview."
- Brokerage van der Linden
